Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15 and 36-37, drawn to a system and method for transmitting messages between two devices, classified in class 709, subclass 206.
 - II. Claim 16, drawn to a data structure, classified in class 707, subclass 102.
 - III. Claims 17-22 and 35, drawn to a device for identifying device location based on messages in an ad-hoc network, classified in class 455, subclass 414.2.
 - IV. Claims 23-34, drawn to a device for storing data structure and location information, classified in class 455, subclass 412.1.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-IV are disclosed as different combinations which are not connected in design, operation or effect. These combinations are independent if it can be shown that (1) they are not disclosed as capable of use together, (2) they have different modes of operation, (3) they have different functions, or (4) they have different effects. (MPEP 806.04, MPEP 808.01).

In the instant case, invention I is directed to a method comprises the steps of managing sessions relating the users and processing requests for digital services received from user. The invention II is directed to a method comprises the steps of

translating input/output commands of the into a remote interactive protocol by the connector.

3. These inventions are distinct for the reasons given above, and the search required for each Group is different and not co-extensive for examination purpose. For example, the searches for the four inventions would not be co-extensive because these groups would require different searches on PTO's classification class and subclass as following:

(a) the Group I search (claims 1-15 and 36-37) would require use of search **Class 709, subclass 206.**

(b) the Group II search (claim 16) would require use of search **Class 707, subclass 102.**

(c) the Group II search (claims 17-22 and 35) would require use of search **Class 455, subclass 414.2.**

(d) the Group II search (claims 23-34) would require use of search **Class 455, subclass 412.1.**

4. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if

one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
